MEZO BUILDATHON · WAVE 1

MUSD COMPASS

Where your MUSD earns most, after costs.

Track 1 · DeFi

Track 2 · Access & Distribution

musd-compass.vercel.app
@musd_compass_bot

THE PROBLEM

ONE STABLECOIN, 11 PLACES TO EARN

11

Places to earn, each quoting its own APR: the Savings Vault, the Stability Pool, six Mezo pools and Mezo-paid pools on Ethereum.

12 week

How long veMEZO rewards stay locked once claimed. A big APR can be mostly lock and very little cash.

Gas

A bridge round trip to reach Ethereum, plus trove interest for anyone borrowing. On a small deposit that can cancel the yield.

THE PRODUCT

NET CARRY: THE CASH YOU KEEP

01 Have BTC? Whether borrowing MUSD to earn pays after the fee and interest

02 Before you go in: the MUSD you keep, costs up front, days to earn them back

03 Break-even: the amount where an Ethereum pool beats the vault

04 Deposit, claim and withdraw on Mezo testnet

05 My MUSD: each holding against the best place, plus veMEZO and trove

MUSD Savings Vault #1 best cash

4.01%

cash a year after costs · no lock

Uniswap V4 USDC/MUSD · Ethereum

−0.03%

+75.66% locked veMEZO, not counted

Live numbers 25 Oct 2026 · 2,000 MUSD · 90-day hold

WHY IT MATTERS

THE BEST PLACE MOVES EVERY WEEK

79.9%

Uniswap V4 veMEZO APR on 25 Oct, up from 49.8% the night before

+60%

MEZO price over the same day, so every locked figure moved with it

7 days

Length of a Mezo Merkl campaign before it renews

Business model. Free for people. Agents and apps pay 0.001 MUSD per premium API call over x402, and a real paid call is on-chain.

WHERE IT RUNS

ONE RANKING, FOUR PLACES

WEB APP

Phone first, light or dark. Connect a wallet picks any browser wallet you have installed.

TELEGRAM BOT

Six buttons. Tap one, answer the question it asks, get the result. Help and FAQ built in.

WIDGET

One script tag puts the top three on any website.

API

Free JSON for apps. A premium report for agents at 0.001 test MUSD per call over x402.

MEZO INTEGRATION

BUILT ON MEZO'S OWN PRODUCTS

Layer	What Compass does
Reads, mainnet	Savings Vault yield events for a 14 day APR, Stability Pool, six Mezo DEX pools, PriceFeed, borrow parameters, TroveManager
Writes, testnet	Savings Vault: approve the exact amount, deposit, claimYield, withdraw. BorrowerOperations: openTrove
veMEZO	Merkl incentives priced at MEZO spot, kept apart from cash, plus an unclaimed-reward check
MUSD as payment	x402 premium API at 0.001 MUSD per call, paid with an exact Permit2 permit; the facilitator pays gas
Composability	Open JSON API, one-tag widget and a pay-per-call API for agents

Compass sends people into the Savings Vault, Mezo pools and Merkl claims. It does not copy them.

PROOF

LIVE, ON-CHAIN AND TESTED

152

automated tests: 88 unit, 39 end-to-end, 25 for the bot, with accessibility checks

ON MEZO TESTNET

Approve, deposit, withdraw, claim
Open a trove, borrow 1,800 MUSD
Deposit those 1,800 MUSD
x402 paid from a second wallet

SAFE BY DESIGN

Allowlist: MUSD, sMUSD, openTrove
Simulates before you sign
Exact approvals, never unlimited
No custody, no keys, no mainnet writes

Explorer links for all transactions are in the README

WHAT COMES NEXT

THREE MILESTONES

WAVE 2

01

WhatsApp bot and alerts

The bot on WhatsApp too, with alerts when a better venue appears or veMEZO waits to be claimed.

WAVE 2

02

Any phone wallet

WalletConnect, so any phone browser can deposit, claim and withdraw. Today that works inside a wallet app's browser.

IN WAVE 2

03

Mainnet and composability

Savings Vault deposits on mainnet after a review, routes into Mezo pools and veMEZO, the API inside other Mezo apps.
